

ERH-400-PT5

Electric Roll Handler

- Easy to use
- Safe & reliable
- Lightweight
- Rugged
- Low maintenance
- Clean rooms
- Food packaging
- Pharma packaging
- Medical packaging
- Converting & printing

The revolutionary ERH-400-PT5 portable electric roll handling machine with 400 lbs (181 kg) capacity is half the size and weight of previous models, yet has 25% more lifting capacity!

ERH-400-PT5 is used to lift and turn rolls by the core for palletizing, transporting and loading. Holding the rolls inside the core without contacting the valuable material reduces the risk of both material damage and operator injury, saving your company money and valuable resources.

The ERH-400, with its lightweight extruded aluminum and steel frame is very easy to push, pull and maneuver even fully loaded and in crowded work areas.

Both the lifting and turning functions are powered and controlled by a simple push-button pendant, eliminating the need to manually handle rolls and reducing the risk of injury to the operator.

Numerous options, base sizes, mast heights and tooling configurations are available. Call Schlumpf today, or visit our web site: www.schlumpf-inc.com.

LIFT · TURN · TRANSPORT · LOAD · UNLOAD · STACK · STORE · PALLETIZE

Standard Features:

Two speed lift & turner drive
Micro pendant with retractile cord
Easy to change battery pack
Ergonomic adjustable handlebar
Non-marking casters
Folding mast reduces shipping size
Reliable electronic controls
Rugged, lightweight construction
Concealed cableway within mast

Specifications:

Max Lifting Weight: 400 lbs (181 kg)
Pallet Width Max: 48"
Vertical Travel: 79" (2000 mm)
Travel Speed: 2 speed at 1.3" per second slow and 3" per second fast
Machine Weight: 250 lbs (114 kg) Aluminum & powder coated steel construction 24 volt DC operation

Options & Accessories:

115 VAC or 230 VAC automatic battery chargers
Spare battery packs for continuous operation
Spare mandrel holder
Anti-telescoping attachment with manually applied, padded O.D. clamp
Expanding mandrels from 3" (76.2 MM) to 12" (304.8 mm)
Automatic mandrel retractor for loading/unloading cantilevered mandrels
Electric remote mandrel gripper retract
Manual remote mandrel gripper retract
